Abstract of JP2002157176

PROBLEM TO BE SOLVED: To make the display of a new device much more visible than the display of other devices if there are many devices to be displayed on a device list.

SOLUTION: If at least one device newly searched is identified by comparing a list of renewed devices to a list of devices at least searched before the current renewal and stored, and if a device identified as the device newly searched is involved in the list of devices displayed by a network management program 1052, then scrolling is controlled so that the at least one newly searched device is displayed in a specific display area.
